Additional benefits:

9% employer pension contribution

A generous home working package, including mileage reimbursement from your home address for all travel requirements plus monthly allowance.

Two additional days annual leave awarded after two years' service.

Overall purpose of the job

This is an exciting opportunity for an entry-level candidate seeking to launch their career in environmental conservation, from within a leading environmental charity, delivering ambitious ecological schemes along Britain's longest river.

The role will provide hands-on support to the lower division of our Operations Team, bolstering resources and enabling us to scale up our exciting portfolio of environmental programmes throughout the Warwickshire Avon and Severn Vale catchments.

You will provide end-to-end support to our farm advice and ecological restoration programmes in the region. Day-to-day activities will include practical assistance with planning and delivering a range of habitat creation and restoration initiatives, supporting the coordination of local farm cluster and catchment partnership events, alongside landowner engagement and wider team support.

Our Challenge

The Severn is the longest river in the United Kingdom, stretching 220 miles from its source in the Cambrian Mountains in Powys Wales, through the counties of Shropshire, Worcestershire and into Gloucestershire to the iconic estuary. The culture and economies of the historic settlements across the catchment have been intertwined with the river through commercial navigation, fishing, water supply, and trade. Today, the Severn's rivers, including important tributaries such as the Teme, the Stour and the Warwickshire Avon, continue to play an essential role in supporting wildlife, wellbeing and economies of the region.

Our freshwater environments are in trouble like never before. The pressures are seemingly endless – sewage pollution, agricultural run-off, habitat loss and major weather events including drought and flooding are all threatening irreversible destruction of our freshwater ecosystems.

Despite the enormity of the challenge, it's not too late.

Do you want to be part of the river Severn's recovery?

Our Team

Our work is organised across the following four divisions:

- Operations Team
- Development Team
- Community Engagement Team
- Finance and Administration Team

Our staff have an intimate understanding of the River Severn and its tributaries. We're proactive and hands on, working with farmers, land managers and communities to deliver ecological restoration at a local level, with catchment-wide impacts.

Our mission is **a healthy, resilient River Severn for everyone**, and we strive to achieve this by delivering ambitious programmes of work across the following strategic themes;

💧 Restoring our rivers

- Removing barriers to fish migration to reconnect river habitat
- Renaturalising our rivers through works such as re-meandering and installing woody debris.

💧 Recovering our land

- Advising farmers to encourage the adoption of regenerative agriculture practices.
- Restoring and creating habitat mosaics at a catchment scale including; wetlands, riparian woodlands and floodplain meadows.

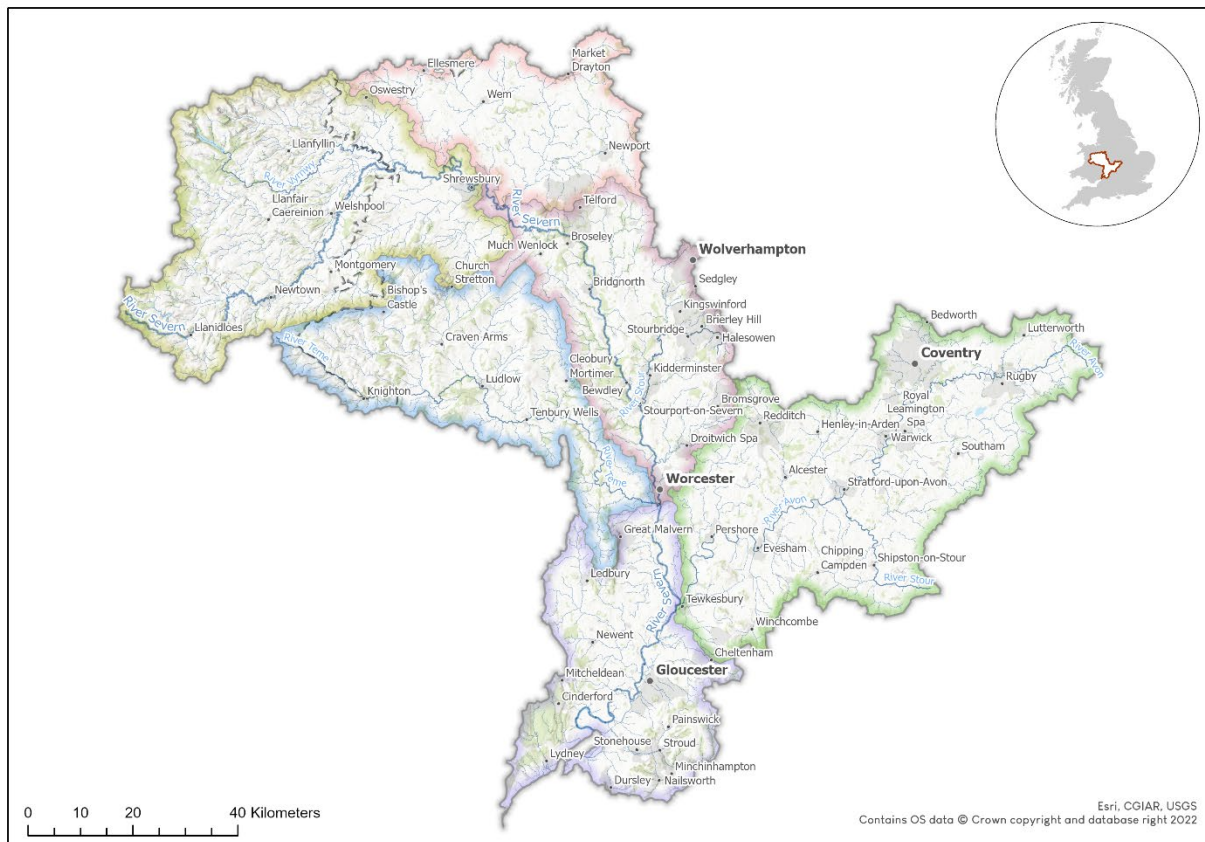

💧 Empowering our communities

- Mobilising volunteers to take action for their local water environment through citizen science monitoring and practical conservation opportunities.
- Establishing inspiring learning programmes to upskill and empower the next generation of river guardians.

Our Working Area

The role will operate throughout the Severn Vale catchment and throughout the Warwickshire Avon catchment. Further information on the geography and conditions of these operational catchments can be found by following the links below.

- ◆ [Severn Vale](#)
- ◆ [Warwickshire Avon](#)

Role Purpose

Project delivery support

- Provide day-to-day practical support in the preparation and delivery of environmental programmes by undertaking the following activities: preparation of external service contracts, contractor engagement, procurement of materials and equipment and on-site practical delivery.
- Assist with ground truthing exercises e.g. desk-based studies and modelling to appraise the optimum location for our interventions
- Support with landowner engagement through farm visits to identify opportunities and secure landowner support for our work.
- Shadow colleagues when delivering professional advice to landowners on a range of environmental priorities.
- Shadow colleagues whilst identifying the best delivery mechanism for each project, (i.e. ascertain whether the landowner, volunteers or external contractors will deliver the intended work)
- Support in the organisation and delivery of farm cluster meetings and demonstration days to promote land use change throughout the Warwickshire Avon catchment
- In time, lead on assigned project tasks, such as the end-to-end oversight of a particular capital works scheme, where you will be responsible for all aspects of the project, from landowner engagement to finance and contractor management.
- Effectively manage and prioritise own workload to ensure project deliverables are met within the project timeframes.

Skills and Experience	Essential	Desirable
Passion and enthusiasm for the conservation sector, particularly rivers and restoring natural processes.	✓	
Basic knowledge of British ecology, with an understanding of aquatic and farmland habitats and wildlife.	✓	
Basic understanding of agricultural systems and able to demonstrate understanding of the potential impact of agricultural practices on our water environment.	✓	
Confidence and willingness to engage independently with landowners and land.	✓	
Keenness and willingness to learn new skills, improve own understanding of the catchment and to engage with opportunities to gain knowledge.	✓	
Experience in adhering to health and safety protocols, including preparing & following risk assessments.	✓
