

Role Summary

Job Title:	Catchment Restoration Officer – Worcestershire Middle Catchment
Location:	Hybrid – Home-based with occasional travel to our Head Office in Martley and across the Severn catchment area
Reporting To:	Programme Manager – Middle Severn
Salary:	£28,000 – £34,500 per annum (pro rata)
Contract Type:	Permanent
Working Hours:	Part-time (3 days/week - 22.5 hours per week)

Benefits:

- 28 days annual leave plus bank holidays
- Two additional days annual leave awarded after two years' service
- 9% employer pension contribution
- Discretionary annual staff incentive scheme
- Generous home working package, including:
 - Mileage reimbursement for all work-related travel
 - Monthly home working allowance

About the Role

We have an exciting opportunity for you to join our Operations Team as a Catchment Restoration Officer, leading the delivery of a wide range of ambitious habitat creation and restoration projects across the Worcestershire Middle region.

From delivering fish passage solutions, to creating new wetlands, to planting native woodlands, this is a hands-on role where you will work directly with private landowners to plan and implement impactful habitat and species conservation at a catchment scale.

You will engage with a diverse range of stakeholders, building support for environmental programmes through practical land management advice. Working collaboratively within a skilled and passionate team, you will draw on the organisation's expertise to ensure every project is delivered to the highest standards. Where additional capacity is required, you will procure and manage contractors, ensuring that all work meets our commitment to quality and ecological value.

Our challenge

The River Severn is Britain's longest river, winding 220 miles from the Cambrian Mountains in Wales through the heart of Shropshire, Worcestershire, and Gloucestershire, before reaching its majestic estuary. For centuries, it has shaped the identity, culture, and economies of the communities along its course. Today, the Severn remains a vital natural resource—supporting rich biodiversity, supplying water to millions, and playing a crucial role in flood resilience and climate adaptation.

Pollution, habitat loss, and the accelerating impacts of climate change are putting immense pressure on rivers like the Severn. Yet, despite these growing challenges, there is still time to act. With the right commitment and collaboration, we can restore and protect these vital ecosystems—and you can be part of the solution.

Our team & ambition

At the heart of Severn Rivers Trust, is our dedicated staff team. We have a passion for what we do and an unrelenting desire to deliver more, faster and with less interruption. In order to achieve this, we need a leading workplace culture that inspires hard work, nurtures ambition and fosters inclusivity. **We want 100% from our team, and in return the team can expect 110% from the Trust.** Our staff team are organised as follows.

Operations Team

Lead the implementation of ecological restoration works and agricultural advice programmes to improve the freshwater environment.

Development Team

Provides cross-cutting technical support to our operations and lead our commercial workstreams, that build financial resilience whilst supporting ecological restoration.

Community Engagement Team

Inspires and empowers local people through education, volunteering, and citizen science initiatives.

Finance & Administration Team

Delivers the vital support that keeps our organisation running smoothly and effectively.

Our Ambition in a nutshell

The 2030 Project

- **Build on our foundations and hone our USP**
We have laid the foundations, and now we're building up. The 2030 project zeros in on what we're best at; delivering meaningful action on the ground.
- **Accelerate delivery & challenge the status quo**
Recovering our rivers is too slow. We have strategies upon strategies, action plans upon action plans, talking shops, and legislative red tape. We believe there is an approach that can navigate this to bring about change now, not in 20 years' time.
- **Doubling our impact**
The 2030 project is about growth. We want to deliver more, we want to deliver it faster, and we want to be braver in our approach, to enable us to double our annual delivery output by 2030

Our working area

This role will primarily focus on the Worcestershire Middle catchment. More information about these areas can be found via:

[Worcestershire Management Catchment](#) | [Catchment Data Explorer](#)

Role purpose

Project Management

- Develop and maintain detailed project delivery programmes with clear milestones.
- Manage resources effectively, deploying the appropriate delivery mechanisms (e.g. external contractors, staff, and volunteers) to implement capital works.
- Oversee the on-site delivery of projects, ensuring consistently high standards and best practice in habitat restoration.
- Prioritise and manage multiple workstreams to meet deadlines and project outcomes.
- Monitor and manage allocated budgets, ensuring all expenditure remains within agreed limits.
- Provide funders with clear, timely, and accurate updates, through concise reports and presentations.

Landowner Engagement & Project Delivery

- Enhance the Trust's profile and credibility across the catchment, with a focus on pre-identified priority areas.
- Build strong relationships with a range of landowners, from farmers to local authorities, to secure their support for project delivery on third-party land.
- Offer professional advice on key environmental priorities such as natural flood management, habitat creation and restoration, water quality improvements, and sustainable land use practices.
- Design and oversee the implementation of land and river management interventions across a landscape that includes both rural and urban environments.
- Actively promote your projects and foster landowner participation and advocacy.
- Stay informed on evolving environmental policy, schemes, and opportunities influencing UK land management.

Partnership Working & Collaboration

- Build and maintain strong relationships with stakeholders, positioning Severn Rivers Trust as a key local delivery partner.
- Collaborate with partners to develop innovative, joint projects that address catchment-scale challenges and priorities.
- Lead the coordination of the Worcestershire Middle Catchment Partnership, inspiring and uniting stakeholders to work collaboratively.

Organisational Contribution

- Contribute to the wider Severn Rivers Trust team and support the delivery of the Trust's strategic objectives.
- Uphold a strong health, safety, and wellbeing culture—taking responsibility for your own safety as well as that of colleagues, volunteers, and partners
- Help foster an inclusive, motivated, and supportive workplace environment where people feel empowered and valued.

Person

Skills & Experience	Essential	Desirable
Experience working with landowners to identify and prioritise opportunities for habitat interventions	☒	
Practical, hands-on experience delivering habitat interventions in farm and river environments	☒
